

AMENDMENTS TO CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently Amended) A folding collapsible combination rack comprising:

a mounting frame formed of a metal wire rod and adapted to be fastened to the wall, said mounting frame including at least one retaining device, each said retaining device having two metal retaining blocks fixedly disposed at two sides thereof of the mounting frame and having a rounded surface; and

at least one rack respectively formed of a metal wire rod and being the same as said retaining device in quantity, said rack bilaterally including two parallel side rods and a bearing frame suspended from said side rods at a bottom side for holding storage items, said two parallel side rods being pivoted to said mounting frame for enabling said rack to be turned with respect to said mounting frame between an operative position, where said bearing frame is positioned horizontally for holding items, and a non-operative position, where said bearing frame is positioned vertically and said side rods of said rack ~~is~~ are respectively engaged with said metal retaining blocks of said retaining device of said mounting frame.

2. (Original) The folding collapsible combination rack as defined in claim 1, wherein said mounting frame comprises two of said retaining devices.

3. (Original) The folding collapsible combination rack as defined in claim 1, wherein each said retaining block of said retaining device is shaped like a ball.

4. (Original) The folding collapsible combination rack as defined in claim 1, wherein said mounting frame bilaterally comprises at least two bearing tips corresponding to said side rods,

Serial Number 10/728,931

each said bearing tip being positioned under each said retaining ~~bock~~block and extending horizontally outwards from said mounting frame in a direction away from the wall and bending inwards towards said mounting frame, each said bearing tip being substantially L-shaped and adapted to hold said side rods of said rack.
